

Preventive Health Exam Billing

To our patients visiting today for a Preventive Health Exam:

Please be aware that during today's visit, if your provider needs to treat a new medical issue or a chronic problem that has changed, your visit may turn into a "Sick Visit" and may result in additional services being billed to your insurance.

Most health insurance companies will pay for Sick Visit evaluations, tests, and treatments, but your insurance plan may require you to pay a co-payment, deductible, and/or co-insurance payment for the Sick Visit, even when it is done during the same appointment as your Preventive Health Exam.
